

## Enhanced 911 Address Update and Verification Form

LaTel Communications has established your original E911 location based on the street address you supplied during the provisioning process. Because Voice over IP (VoIP) can be a nomadic service which means you can move your phone and it will work at another location, you will need to keep the E911 address up to date. Failure to change your E911 address if you move the phone may result in emergency services being dispatched to the wrong location and a fine.

To ensure we have your current address information on file for 911 emergency services, please complete and return this form to LaTel Communications. For companies with phones located at multiple address locations, complete one form per location, and list the associated numbers with each physical address location (attach separate sheets as needed).

Company Name

Main Telephone Number

Address Line 1

Address Line 2

City  State  ZIP Code

Name  Email

Signature  Date

Please fill out and return to [business@latelcommunications.com](mailto:business@latelcommunications.com)
